We decided to organize a waste paper day because we noticed that a lot of useless paper was mostly thrown into the trash. The goal of the Waste Paper Day is to collect and sort the remaining paper and recycle it. This saves the forest (70 kg of paper gives life to one tree). In connection with the Waste Paper Day, we have organized activities related to paper recycling: crafts, paper books, cards, masks, posters. We weight the pile of the gathered paper and by the end of the day we will know how many trees we have saved. Waste Paper Day is a tradition and it involves the whole community.
